FAST University is offering third year students to apply for internship. You have been hired by the University to develop the application to aid students in order to apply for internship. Your task for this assignment is to make them an application using **MEAN** stack, which should possess the following features:

- Registration page that allows a student to register. The system asks for name, email, roll no and password to create account.
- Login page through which an existing user can log in into the system.
- To apply for internships, students has to provide their personal details i.e. name, age, and gender, date of birth ,Cnic number and picture.
- Student is also required to provide additional information like skills they possess, activities, achievements and any previous experience they have.
- A login page for admin. The username and password for the admin is "web2019" and "2019web" respectively.
- Admin can view the information entered by all the students and can even delete any information if required.
- Admin also has the option to edit the information of any student.
